DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 7, 9-16 and 43 are drawn to an antimalarial composition comprising an inhibitor of fatty acid syntheses, classified in class 514, subclasses 721 and 895.
- II. Claims 8 and 44-49 are drawn to an antimalarial composition comprising an inhibitor of fatty acid synthesis and one or more known antimalarials, classified in class 514, subclasses 721 and 895.
- III. Claims 19 and 20 are drawn to an antimalarial drug target, classified in class 435, various subclasses.
- IV. Claims 36-42 are drawn to compounds, classified in class 562, various subclasses.
- V. Claim 50 is drawn to a composition comprising triclosan and cerulenin, classified in class 514, subclass 721.

The five inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their different classification and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.
